Position: R&D Projects Developer

Description of the job position

IREC is looking for an Interim R&D Projects Developer to fill the job for the duration of the selection process for its permanent appointment, in accordance with the regulations of the public sector. The professional will be responsible for promotion of R&D&i projects and business development within the Corporate Development and Technology Transfer department. In particular, tasks will include promotion of international R&D&i competitive-funded projects, mainly under the Horizon Europe programme, proposal preparation, consortia formation, partner search, participation in brokerage events and budget definition. Tasks may also include proposal preparation of R&D&i proposals at national level and in collaboration with industry. The professional will be also expected to give support in data management, open science and gender issues in research matters.

The professional must be highly skilled and have proven experience in the preparation and management of competitive R&D&i projects, both at European (H2020, HE, LIFE...) and national (AEI, ACCIO, AGAUR...) levels. Experience in research data management, open science and genre issues in research projects will be valued. Capacity to work in a team, flexible, service oriented with initiative and problem-solving skills would be valuable. High level of communication and negotiation skills are mandatory.

Requirements:

Essential:

- University Degree in Science, Engineering or Technology.
- PhD in the Energy sector, Physics, Chemistry, Engineering or similar
- Proven experience (minimum 5 years) in competitive Project preparation and management (H2020, HE, AEI, AGAUR...)
- Experience in research centres and/or universities.
- High proficiency in English. Good command of Spanish and Catalan.
- Proficiency in the use of MS Office tools and ERP tools (SAP).
- Experience in research data management plans, ethics and genre issues in research and research projects and open science.
- Training courses directly related to the functions of the workplace.

Preferred:

- Knowledge and/or experience on renewable energies, smart grids, energy efficiency and energy sector.
- Experience in relationship with stakeholders, negotiation and agreements.
- Experience in providing formation in research data management plans, ethics and genre issues in research aspects.

Personal skills:

- Autonomy, planning and organization
- Communication and negotiations skills
- Decision-making
- Results-oriented and analytical
- Team worker
- Self-motivated and open-minded

Salary:

Salaries will be paid in accordance with the IREC's salary policy, depending on the candidate's qualification and professional experience.

Send applications by email directly to mfonrodona@irec.cat indicate R&D Projects Developer (2024/79) in the subject including:

- A motivation letter with reasons for applying, relevant experience, qualifications and value proposition related to the vacancy
- Curriculum vitae with personal, academic and professional data.

Deadline for applications: **XX** July 2024
